

M22

Weld spatter release

Description

Metalube M22 is a highly effective, water based release agent for weld spatter. It is designed to be used on metal parts, nozzles jigs and fixtures. The water based formulation and nitrogen propellant system result in a product that is totally non-flammable without the use of hazardous chlorinated solvents to minimize health, safety and flammability concerns in the working environment.

Features and benefits

- Highly effective barrier to prevent adhesion of weld spatter
- Free from hazardous solvents to ensure maximum operator acceptability
- Non-flammable to minimize hazards in the welding environment
- Non-silicone, water based film ensures maximum compatibility with subsequent treatment or painting operations
- Does not interfere with weld formation

Recommended instructions for use

Shake well, hold upright and spray from a distance of approximately 15-30cm.

Pack sizes

300ml aerosol

Technical data (typical values)

Property	Test method	Result
Appearance	MSTM 1	Almost colourless wet film
Propellant	-	Nitrogen
Solvent	-	Water
